Publishing Distribution Platform (PDP)

The Publishing Distribution Platform is a matchmaking tool, developed by [Federación de Asociaciones Nacionales de Distribuidores de Ediciones \(FANDE\)](#) and [International Publishing Distribution Association \(IPDA\)](#), as a permanent hub for the international publishing community, providing information and connection between Publishers / Content Providers that are looking for distribution services, and Distribution companies that are offering its services in different countries.

The main proposal of the project is connect the whole international publishing community in order to make grow business opportunities.

PDP allows to PUBLISHERS and DISTRIBUTORS, introduce in the platform its own company information in order to create a company profile useful for search international contacts regarding business and commercial projects. PDP also include a **SEARCH TOOL** for the selection of PUBLISHERS and DISTRIBUTORS, considering different topics (products, company profile, distribution area...)
